

NORMAN Security Suite PRO

- ANTIVIRUS & ANTISPYWARE
- PERSONAL FIREWALL
- INTRUSION GUARD

- ANTISPAM
- PARENTAL CONTROL
- PRIVACY TOOLS

Norman Security Suite PRO is the all-in-one security solution that protects your identity, your PC and home network whether you are banking, playing games, chatting, using social networking sites or just surfing the Internet.

For extra safety, we have included Intrusion Guard to prevent unauthorized applications or programs from taking control of your PC. An advanced Privacy Tool application helps you securely delete specific files, as well as automatically delete various files containing personal data, log files and browser history.

This easy-to-use security solution features world leading technology to provide the best protection against viruses, worms, trojans, spyware, hackers and other hostile activity.

Features

- Antivirus
- Antispyware
- Antispam
- Personal Firewall
- Parental Control
- Intrusion Guard
- Privacy Tools
- Antiphishing
- Rootkit detection
- Screensaver with malwarescanner

Product benefits

• **Automatic Virus and Spyware protection** recognizes, blocks, and removes unwanted programs such as viruses, worms, trojans and other varieties of destructive program code. These unwanted programs, also called malware, can jeopardize your privacy and identity, and reduce computer performance.

• **Proactive malware protection** with Norman SandBox®, DNA Matching and Exploit Detection. These technologies protect against new and unknown malware, keeping your personal data resistant to the daily influx of newborn threats.

• **Protects email, instant message attachments, Internet downloads, and web browsing** from malware like viruses, spyware, trojans, and other threats that may enter your computer.

• **Intrusion Guard** prevents unauthorized programs from taking control of your PC. The expert utility called Advanced System Reporter is an easy-to-use reporting tool helps you log, block and stay warned against any hostile activity from intruders such as spyware, injection attempts, rootkits, deceptive applications and cyber attacks. The real-time components constitutes as a Host-based Intrusion Prevention System (HIPS).

• **Privacy Tools** Select your own privacy level with Norman Privacy Tools. The advanced Privacy Tool application offers a secure deletion feature wiping a file 7 times with random data to guarantee safe deletion. Privacy Tool supports Microsoft Explorer - simply right click on the file(s) and delete. In addition, it gives you various options to delete temporary files and logs from browsers and the operating system.

NORMAN SANDBOX® is a revolutionary way to detect new and unknown malware in a proactive way.

NORMAN DNA MATCHING is a proactive technology and method for identifying the viral profile of all kinds of malicious programs, by recognizing inherited or reused programming codes in new malware.

NORMAN EXPLOIT DETECTION is a technology for detecting malware exploiting vulnerabilities in widely used document types.

The user interface is intuitive, fresh and easy to use. If security incidents or some settings needs your attention, you can't miss it. We've done all we can to make sure you're fully protected at all times!

SCREENSAVER WITH MALWARESCANNER

An on-demand antivirus and antispyware screensaver scanner is included in this package. The scanner will start to scan all available drives once the screen saver kicks in, making sure your data are malware free before you access them.

SYSTEM REQUIREMENTS

- Windows XP 32-bit SP2 or higher
 - Windows Vista 32- or 64-bit SP1 or higher
 - Windows 7 32- or 64-bit
- Internet Explorer 7 or later
- CPU: 1,8 GHz 32-bit (x86) or 64-bit (x64) processor
- RAM: 2 GB recommended
- 500 MB of available disk space
- Recommended minimum screen resolution: 1024 x 768

More product benefits

- **Antispam** keeps your inbox free from unwanted junk mail. The spam engine with a detection rate of nearly 98%, stops unwanted, fraudulent and phishing emails ensuring uninterrupted service delivering the emails you really need.
- **Parental Control** protects you and your family by limiting access to specific web sites. The system is based on pre-defined rules preventing selected user groups from accessing undesirable websites containing pornography, weapon information, or other inappropriate material.
- **Advanced Firewall** provides real-time protection against hackers and malicious web robots by filtering inbound and outbound traffic as well as alerting you to any attempted attack.
- **Antiphishing** protects you from emails leading you to give away personal information or credit card information that can be misused.
- **Rootkit detection** uncovers and removes hidden code utilizing stealth mechanisms.
- **Auto-update of all modules** runs silently in the background, as any new security update will automatically be downloaded and installed silently.
- **Security status and activity summary** gives you security health status at a glance.
